

# 15 Years of Workforce Optimization Solutions for Liebherr Fleet Owners

11 November 2021

Immersive technologies have a strong history of supporting mining customers in the development of safe and productive equipment operators. Over the past 15 years they have brought the most effective and efficient [Liebherr simulator training solutions](#) to mines across the world. In 2006 Immersive Technologies developed the first Liebherr T282 Haul Truck simulator for a large mine in the U.S. Rapidly thereafter the product range expanded to support a large range of hydraulic shovels, backhoes and additional haul trucks. The largest end user of the Liebherr simulator range have been the Tier 1 Western Australian iron ore mines. The Liebherr equipment simulators have also produced significant benefit to mines in 14 other countries including multiple Global Business Improvement Award winners.

Simulator for Liebherr T282C, T284 Haul Trucks

Simulator for Liebherr R9400 Shovel/Excavator

Some recent examples of customer value realized by training operators with the Immersive Technologies solution include an 11% spot time reduction, a 36% reduction in machine abuse events, and an 8% instantaneous dig rate improvement.

*"It is our continual focus on customer outcomes which has produced quantifiable return on investment for many Liebherr fleet owners across the mining industry. We are proud to support these mines, many of whom operate mixed fleets and benefit from our all makes all models approach" says - **David Anderson**, CEO Immersive Technologies.*

###

## About Immersive Technologies

Immersive Technologies is the world's largest, proven and tested supplier of surface and underground Advanced Equipment Simulators to the global mining industry. The company has achieved this unique position by focusing on its mission to increase Customer profitability by optimizing the safety and productivity of their operators. Immersive Technologies' Advanced Equipment Simulators are helping hundreds of mining companies around the world to increase their equipment operators' safety and site profitability through effective simulation training.
